By Kristen Stephenson | Published 29 July 2016

What's bright, colorful and in the shape of Big Ben? The latest record broken in Richmond, British Columbia, Canada.

On June 30, many gathered around to view the stunning display of the **Largest PEZ dispenser sculpture** at the Aberdeen Centre. The total measurements of the massive art piece was 5 ft x 5 ft x 7 ft, making it a giant display of originality and history.

The sculpture was designed by artist Dio Wong, who is based out of Tokyo. With the help of several members of the local community, Wong and enthusiastic volunteers worked to stack the Pez dispensers to make an accurately scaled replica of the London landmark.

It took 9,404 dispensers to compose the sculpture, which was created in honour of a summer promotion at the Center known as "London Calling", a summer exhibition of English culture and antiquity, which runs through September.

Those who decide to visit the grand display can experience a taste of England, while also seeing the London Eye and the Tower Bridge; an impressive edible display assembled out of Pez candy.

From candy container to a work of art, it's safe to say this new record has become one of the Lower Mainland's sweeter sights to see.
